

<http://gallery.sourceforge.net/>

The Gallery Project Needs your help making Gallery 2 a reality in the next few months!

Gallery 2 is currently at a very stable Alpha 4 release.

We are looking for help in several areas, specifically:

#### User Interface Design:

- someone with a lot of experience with UI work  
(we'll want to see your portfolio)
- Cross platform CSS/HTML experience
- experience with the Smarty templating system is a big plus.

#### PHP Programming:

- experience with Object Oriented development in PHP
- Java/J2EE experience a big plus
- experience with Agile Development, phpunit is a plus
- experience with XSLT/XML is a plus

Candidates for the development team will be reliable, self motivated, eager to learn, willing to be flexible, and able to work efficiently as part of a team using the internet as the sole means of communication. There are weekly meetings of the development team that can be scheduled to ensure that the most people possible attend, and generally weekly progress and progress reports are expected.

#### Whats in it for you:

- No cash. Money is fleeting, glory is forever!
- Contributing back to Open Source Software
- Name recognition from working on a very popular Open Source Project
- Great resume experience
- Networking with a global team of professional developers, system administrators, security experts and professional photographers who work for companies such as Sun, Google, and Microsoft.

Gallery is one of the more popular open source projects:

- The number 1 photo sharing web application
- over 100,000 known installs
- regularly in the top 10 most active projects on SourceForge
- SourceForge Project Of The Month for October 2003

Please send resume, portfolio, and a statement of why you are interested to [ckdake@users.sf.net](mailto:ckdake@users.sf.net)
